

QUESTIONABLE?

WHY AN UNTESTED CITIZENSHIP
QUESTION THREATENS THE 2020 CENSUS

Jennifer Van Hook

Professor of Sociology & Demography

The Pennsylvania State University

WHAT'S THE HARM IN ASKING?

Is this person a citizen of the United States?

- Yes, born in the United States
- Yes, born in Puerto Rico, Guam, the U.S. Virgin Islands, or Northern Marianas
- Yes, born abroad of U.S. citizen parent or parents
- Yes, U.S. citizen by naturalization – *Print year of naturalization* ↘
- No, not a U.S. citizen

ADDING THE CITIZENSHIP QUESTION WILL INCREASE RESPONDENT BURDEN BECAUSE IT IS SENSITIVE

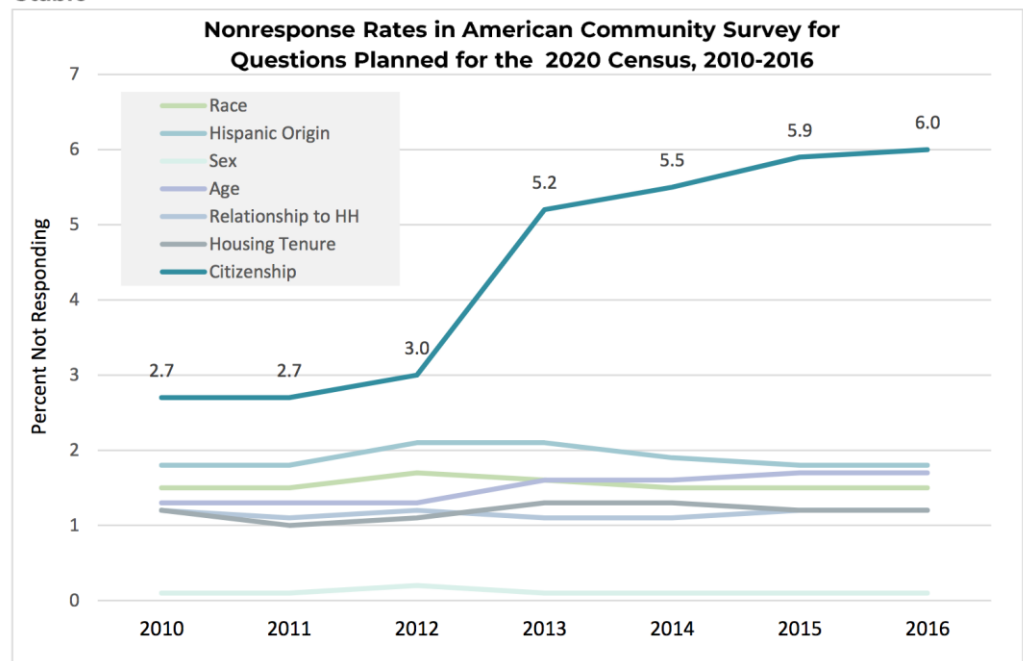

CENSUS BUREAU HAS OPPOSED INCLUDING THE QUESTION ON THE DECENNIAL CENSUS IN THE PAST

- “Obtaining the cooperation of a suspicious and fearful population would be impossible if the group being counted perceived any possibility of the information being used against them. Questions as to citizenship are particularly sensitive in minority communities and would inevitably trigger hostility, resentment and refusal to cooperate.”
- --Census Bureau argument in *Federation for American Immigration Reform v. Klutznick*, 486 F. Supp. 564 (D.D.C. 1980):

HIGH ITEM- NONRESPONSE

More people skip the citizenship question than any other decennial census question

Figure 1. Nonresponse Rates for the Citizenship Question Have Increased Since 2010 while the Nonresponse Rates for Other Questions Have Remained Relatively Stable

Source: American Community Survey Item Allocation Rates. Available at <https://www.census.gov/acs/www/methodology/sample-size-and-data-quality/item-allocation-rates>.

O'Hare, William P. 2018. Citizenship Question Nonresponse: Demographic Profile of People Who Do Not Respond to the American Community Survey Citizenship Question. Georgetown Law Center on Poverty and Inequality.

More than 1 in 3 non-citizens are incorrectly reported as citizens

INACCURATE
REPORTING

Panel B. Percentage of Administrative Record Noncitizens who respond as 2016 ACS Citizens

Notes: Administrative record noncitizens make up 6.7 percent of the overall 2016 ACS sample, 1.9 percent for non-Hispanic white, 5.1 percent of non-Hispanic black, 16.2 percent of Hispanic, 22.0 percent of non-Hispanic other race, 6.9 percent of reference persons, 6.5 percent of relatives, and 7.1 percent of nonrelatives. See Appendix Table A10.

CENTER FOR
SURVEY
MEASUREMENT
2017 STUDY

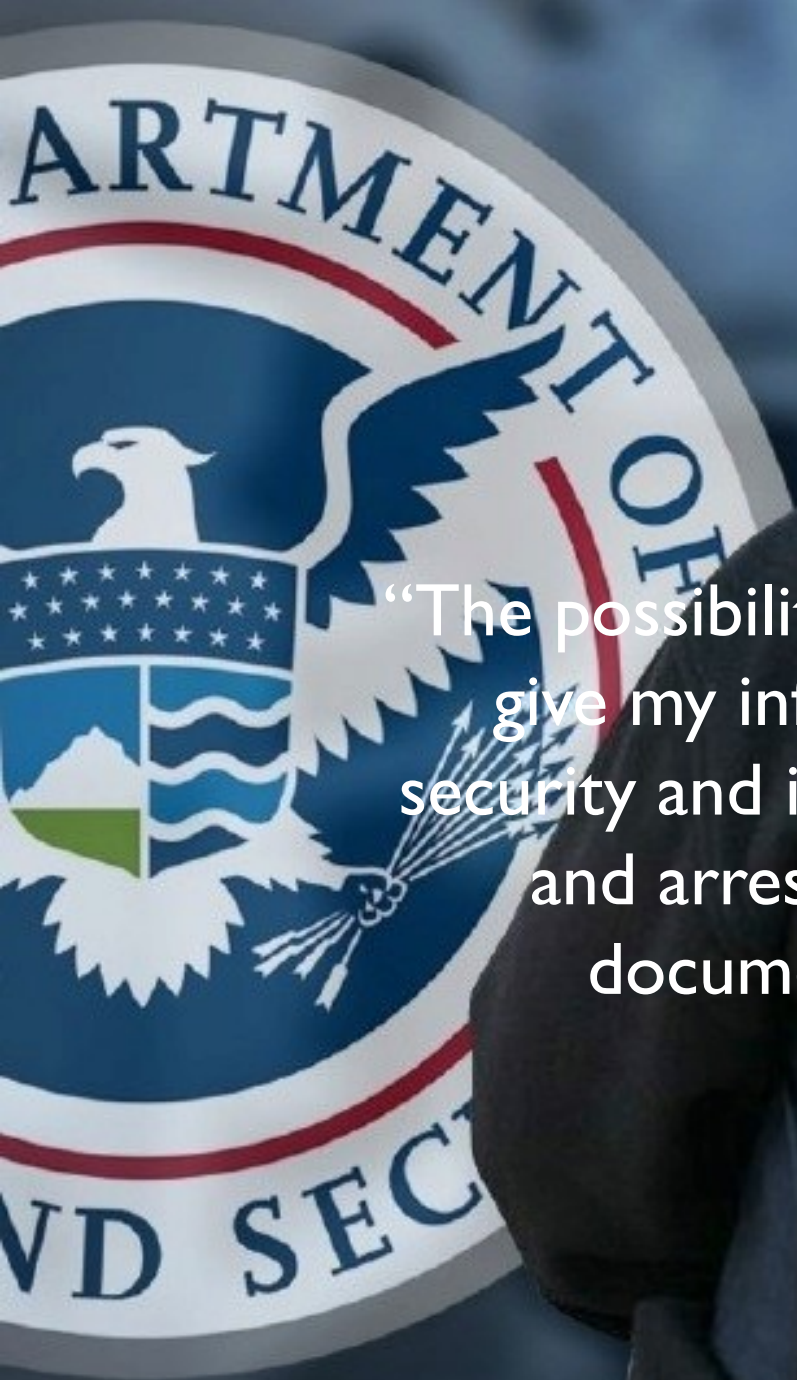

Respondents had received advice not to open the door without warrant

Respondents deliberately omitted people from household roster or gave false names due to “political climate”

One man walked out when the immigration questions came up

“The possibility that the Census could give my information to internal security and immigration could come and arrest me for not having documents terrifies me.”

**POLICE
ICE**

“Three years ago I didn’t have problems with the immigration questions.”

-ACS interviewer

The citizenship question may be a major barrier

1. **Its purpose is to find undocumented immigrants**
2. **The political discourse is targeting their ethnic group – residents and citizens may also feel endangered**

“ [The purpose is] to make people panic... Some **people will panic because they are afraid that they might be deported.** ”
— Vietnamese

“ ICE is working with different groups on **deportation sweeps, and it would make me feel like I'm aiding in that.** They're doing a lot of illegal stuff, and so I wouldn't fill out any of the questions.”
— MENA

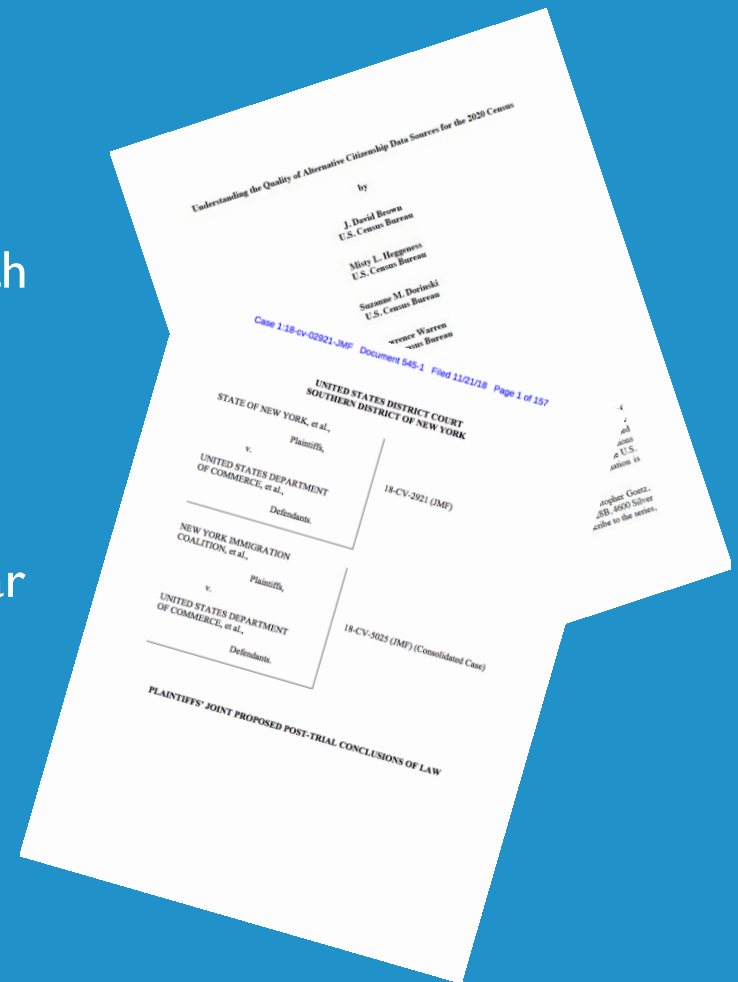

“ For this census, a lot of people are afraid. **It doesn't matter if they ask you whether or not you're a citizen.** The first question they ask you, are you Hispanic or Latino? And that's enough. That's all they need. And people are scared.”
— Spanish (U.S. Mainland)

“ [Latinos will not participate] out of fear...[there] is **practically a hunt** [for us] ...**Latinos are going to be afraid to be counted because of the retaliation that could happen** - it's like giving the government information, saying, 'Oh, there are more here.' ”
— Spanish (U.S. Mainland)

2020 CENSUS BARRIERS, ATTITUDES AND MOTIVATORS STUDY (OCT 2018)

ADDING THE CITIZENSHIP QUESTION WILL REDUCE RESPONSE RATES TO THE DECENNIAL CENSUS

- No random control trial done. But Census attempted to estimate the effect
 - Compared nonresponse on 2010 ACS with 2010 Census
 - Concluded self-response will decrease by 5.8% for non-citizen households
 - Did not account for current climate of fear
- Filings in recent court cases suggest it could decrease as much as 11.9%

LOW RESPONSE RATES
CANNOT BE EASILY
FIXED

Census has large nonresponse
follow-up operation.

But it will not solve all problems

- Proxy and imputed responses not as accurate
- Groups with high nonresponse also have high omissions rates
- Differential coverage error persists for hard-to-count groups

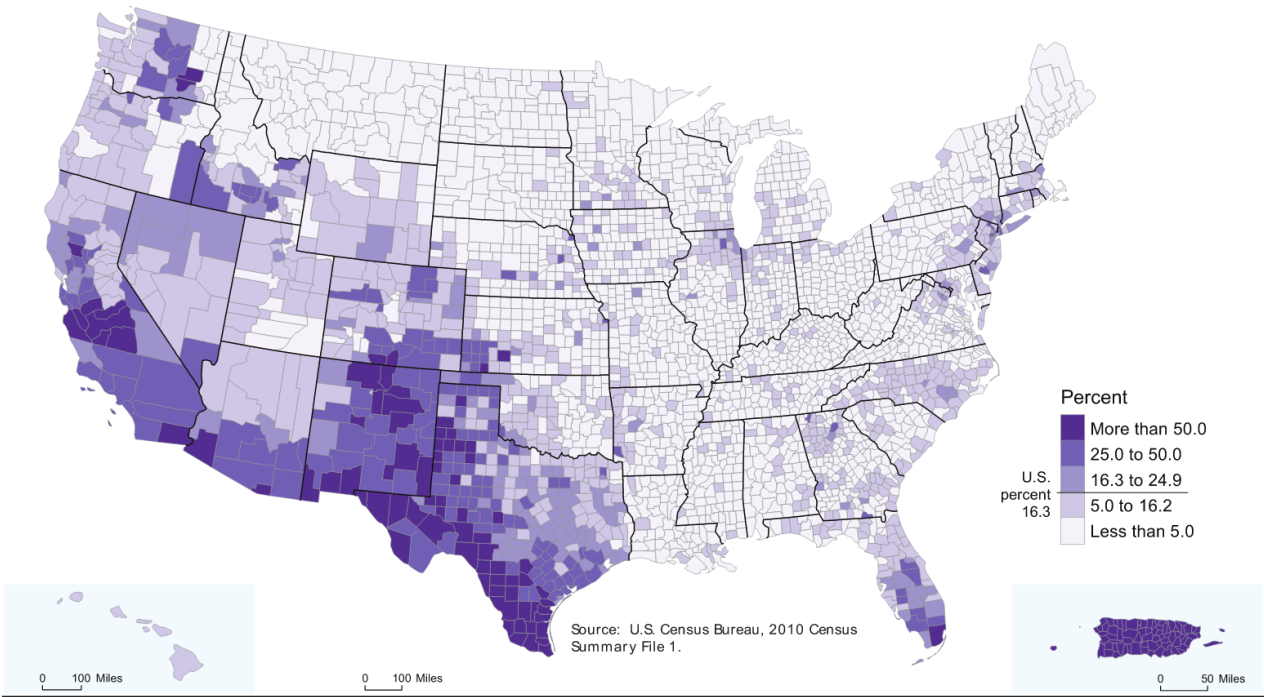

IT IS UNNECESSARY TO COLLECT
DATA ON CITIZENSHIP IN THE
DECENNIAL CENSUS

- The American Community Survey (ACS) already measures the citizenship voting-age population
- ACS provides both the Justice Department and researchers with sufficiently detailed data to study noncitizen populations, particularly when paired with other data sources

Hispanic or Latino Population as a Percent of Total Population by County: 2010

(For information on confidentiality protection, nonsampling error, and definitions, see www.census.gov/prod/cen2010/doc/sf1.pdf)

CONSEQUENCES FOR AMERICA

OVER THE NEXT
DECADE...

Inaccurate data for
apportionment and
redistricting

Misallocation of \$700 billion
in federal and state funds

Lower quality data on all
surveys, jeopardizing
informed decision-making

Reduced public trust in
Census Bureau and its data

TRUST MATTERS

Parents at Funston Elementary in Logan Square received a brief training before heading out into the streets to spread the word.

- Required for collecting high-quality data
 - Building relationships with communities
 - Strictly adhering to privacy and confidentiality laws
- Required for legitimacy as data provider
 - Transparent and open decision-making processes
 - Staying out of politics
- Why jeopardize this trust with a sensitive, untested, and unneeded question?
